MOST IMPORTANT INFORMATION ABOUT VOSEVI

VOSEVI can cause serious side effects, including:

Hepatitis B virus reactivation: Before starting treatment with VOSEVI, your healthcare provider will do blood tests to check for hepatitis B infection. If you have ever had hepatitis B, the hepatitis B virus could become active again during or after treatment with VOSEVI. This may cause serious liver problems including liver failure and death. Your healthcare provider will monitor you if you are at risk for hepatitis B reactivation during treatment and after you stop taking VOSEVI.

POSSIBLE SIDE EFFECTS OF VOSEVI

VOSEVI can cause serious side effects, including:

- Those in the “Most Important Information about VOSEVI” section.
- In people who had or have advanced liver problems before starting treatment with VOSEVI: rare risk of worsening liver problems, liver failure and death. Your healthcare provider will check you for signs and symptoms of worsening liver problems during treatment with VOSEVI. Tell your healthcare provider right away if you have any of the following signs and symptoms:
 - nausea
 - tiredness
 - yellowing of your skin or white part of your eyes
 - bleeding or bruising more easily than normal
 - confusion
 - dark, black, or bloody stool
 - loss of appetite
 - diarrhea
 - dark or brown (tea-colored) urine
 - swelling of your stomach area (abdomen) or pain on the upper right side of your stomach area
 - sleepiness
 - vomiting of blood
 - lightheadedness
- **Slow heart rate (bradycardia):** VOSEVI, when taken with amiodarone (Cordarone®, Nexterone®, Pacerone®), a medicine used to treat certain heart problems, may cause serious side effects, including slow heart rate. In some cases slow heart rate has led to death or the need for a heart pacemaker when amiodarone is taken with medicines containing sofosbuvir. Get medical help right away if you take amiodarone with VOSEVI and get any of the following symptoms:
 - fainting or near-fainting
 - dizziness or lightheadedness
 - not feeling well
 - weakness
 - extreme tiredness
 - shortness of breath
 - chest pains
 - confusion
 - memory problems

The most common side effects of VOSEVI include headache, tiredness, diarrhea, and nausea.

These are not all the possible side effects of VOSEVI. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

IMPORTANT FACTS

This is only a brief summary of important information about VOSEVI and does not replace talking to your healthcare provider about your condition and your treatment.

ABOUT VOSEVI

VOSEVI is a prescription medicine used to treat adults with chronic (lasting a long time) hepatitis C (Hep C) infection with or without cirrhosis (compensated) who have:

- genotype 1, 2, 3, 4, 5, or 6 infection and have previously been treated with a Hep C regimen containing an NS5A inhibitor.
- genotype 1a or 3 infection and have previously been treated with a Hep C regimen containing sofosbuvir without an NS5A inhibitor.

Do not take VOSEVI if you take medicines that contain rifampin (Rifater®, Rifamate®, Rimactane®, Rifadin®).

BEFORE TAKING VOSEVI

Tell your healthcare provider about all of your medical conditions, including if you:

- have ever had hepatitis B infection
- have liver problems other than hepatitis C infection
- are pregnant or breastfeeding, or plan to become pregnant or breastfeed

Tell your healthcare provider about all the medicines you take:

- Keep a list that includes all prescription and over-the-counter medicines, vitamins, and herbal supplements, and show it to your healthcare provider.

VOSEVI and certain medicines may affect each other, or cause side effects.

HOW TO TAKE VOSEVI

- Take VOSEVI with food.
- If you need to take an antacid that contains aluminum or magnesium, take it 4 hours before or 4 hours after you take VOSEVI.
